

Product Manual | Ball Marine Boat Hook (Pro)

Set-up and Installation

Upon carefully removing packaging, screw together all components ensuring tight fit. Tighten well by hand only, ensuring threads line up. Hook head to be attached to top of post and leather handle should show at the very bottom of the boat hook.

Correct Use

Boat hook should be used for collecting ropes and gentle fending only. Never place your body between the boat hook and a solid item when craft is moving.

Vertical pressure should be applied only. Do you use boat hook as a lever.

Hands should be placed one on the bottom leather handle and one on the mid point of the boat hook.

Use large hook end for rope collection purposes and hook head for gentle fending.

Product Maintenance and Care Instructions

After use, we recommend rinsing the product with fresh running water and drying external parts well.

For a deeper clean (recommended only periodically) use a mild detergent and water solution. Flush and rinse well with fresh water and hand dry well.

Avoid rubbing or scratching carbon fiber against hard surfaces to maintain finish.

Leather cleaning products can be used on grip.

Servicing and Warranty Claims

Please contact Ball Marine Limited for 'how to' information and service providers for maintaining and servicing your boat hook.

Warranty information is available via our website at www.ballmarine.com
